

Design

CREATIVE. INNOVATIVE. EXCELLENT.

DESIGN - LANGUAGE THAT MOVES.

Design that touches your soul is like music that is understood anywhere in the world. And just like music changes, the language of design evolves. Today, it is not just about form and function, colours and materials. Or beat and rhythm. Or technology. It is about emotion. Even – or especially – when it comes to design.

The design idiom is central to our company. Our designers develop product lines that stand for quality and innovation, simplicity and a user-oriented philosophy. The cuboid THINK.TANK, complex room systems or the NET.WORK.PLACE LOUNGE CHAIR – everything has to reflect K+N's design DNA. The many awards and recognitions in recent years are evidence that we hit the spot with our design style.

K+N WERKSDESIGN

Form follows benefit follows emotion - This is the motto under which they create functional and aesthetically appealing products and furnishing solutions in the K+N design workshop, with the aim of making the office into a place of identification and motivation.

2DODESIGN

Dietmar Fissl founded the Stuttgart design studio 2DO-DESIGN together with Angela Eberhardt in 2008. Their main areas of activity are interior office, living, kitchen and lighting within the interior design sector. The product developments have already received many international awards.

BALLENDAT DESIGN

Martin Ballendats was to find a clear reduced concept that fulfils the complex technical requirements of the market and is based on a timeless and linear design with

universal appeal. His philosophy is backed up by prizes and over 70 design awards.

ITO[®] DESIGN

ITO DESIGN

Form without function is useless. Function without form is unsatisfactory. It is only possible to achieve a design that is truly of high quality if there is a perfect symbiosis of the two. Top-quality innovative furniture - especially for office applications - has been created from this premise.

CODE2DESIGN

Michael Schmidt and his team of designers stand for innovative design and successful products. They tell a story that serves the functional aspects and above all fulfills people's emotional needs and desires
