

Iconic Award 2019

INTRICATE STYLING. INTUITIVE FUNCTIONS. ICONIC AWARD.

The JET.III task chair from König + Neurath wins the ICONIC Award

Every year the [German Design Council](#) confers awards for leading-edge architecture, innovative products and sustainable communication. The [JET.III task chair](#) from König + Neurath, an innovative product that was presented for the first time at Orgatec in October 2018, has received an award in the category "Office and Workplace" for its aesthetic design and outstanding product features

” The **ICONIC AWARDS Innovative Interior** – a distinction awarded to the best of the best “

JET.III is the ideal choice when office design calls for comfort and optimum working conditions to suit employees of all shapes and sizes. This task chair from our portfolio features individual adjustment options

controlled by just two buttons to ensure first-class comfort – and it’s just as comfortable regardless of height or weight. The synchro mechanism was developed and produced by our own design engineers in Karben to support a flowing movement sequence.

But the JET.III from König + Neurath has more to offer in addition to its outstanding product specifications: “The most striking feature is the backrest design. The intricate connections in the back’s construction are reminiscent of the ribbed structure of a leaf – and from the side it resembles a silhouette of the spine,” is how Cornelius Müller-Schellhorn, Head of Design and Development at König + Neurath, describes the chair’s appearance. JET.III radiates a positive charisma thanks to its elegant design and intricate style details – we call it the [#keepsmlingeffect](#).
