

On the way to our clients

ON TIME. ON DEMAND. ON CALL.

OUR ROUTE PLANNING

The delivery of the furniture represents the final stage of the process involved in creating new office environments – and it is your first encounter with your future work setting. This is where we aim to ensure that you are fully satisfied with our service.

State-of-the-art logistics software allows us to plan routes in detail and to consolidate shipments for economic efficiency. This results in optimum capacity utilisation for our trucks with the least possible impact on the environment. Beyond this, our delivery performance is marked by exceptional reliability and punctuality while retaining the necessary flexibility to accommodate our customers' individual wishes. This is possible because we are always able to track our trucks' routes by electronic means.

Transparency of delivery performance

Our K+N “Call the truck” app offers you a very special service: it allows you to contact the driver personally one day prior to delivery, to share details or changes regarding delivery.
